

DLC series

ORTEA product range is completed by a range of **line conditioners** based on voltage stabilisers and **provided with additional protective devices.**

The following sketch shows the typical line conditioners:

- **Input automatic circuit breaker** (protection against short-circuit).
- Delta/Star or Delta/Zig-zag **input isolation transformer** (complete galvanic isolation between the mains and the load and cancellation of third and triplen harmonics).
- **Class 1 SPD surge protective device** (protection against lightning).
- **Class 2 SPD surge protective device** (protection against transients).
- **EMI/RFI filter** (protection against electro-magnetic and radio-frequency noise).

Lybra	Single-phase	Vega/Antares	+ advanced protection	0.3-135kVA
Aries	Three-phase	Orion	+ advanced protection	2-250kVA
Aries Plus	Three-phase	Orion Plus	+ advanced protection	30-1250kVA
Discovery	Three-phase	Sirius	+ advanced protection	60-6000kVA
